

# Chinland Agriculture Products

## Company Profile

“ Plant, Live & Grow Together ”

## Why CAP?

### **From 2015 to 2018, Chinland Agriculture Products Company Founder and Chairman Salai Bawi Lian Khum visited 200 villages in Kalay township areas and Chin State.**

From these tours, the key findings were: farmers in rural areas were unable to properly cultivate their land, poor choice of crops, and methods of cultivation and lack of market for their harvest were the farmers main problems. This ironic experience gave birth to Chinland Agriculture Products Company (here after CAP) in Kalay with Directorate of Investment and Company Administration (DICA) registration number 102539656 . Chinland Agriculture Products Company envision to solve farmers problems and increase their life standards through proper cultivation and markets for their harvest.

### **Farmers are at our heart:**

A land occupied by 70% of poor farmers are incredibly blessed with bio-organic foods that are extremely essential for Healthy Living. However, Farmers struggle to cultivate successfully. Therefore, Chinland Agriculture Products Company takes step "To Empower the Farmers." We work together with Farmers to successfully grow and actively search for market where the goods can be sold. Chinland Agriculture Products Company buys and prepares raw agriculture products and turn into high-quality value-added products. Chinland Agriculture Products Company provides: seeds, fertilizers, soil testing, farming training and other technologies to increase the Live standard of Farmers, uplift the economic conditions of the poor farmers, empower women, and reduces the unemployment rate and alleviate poverty in Myanmar.

## **We care your health, your well-being**

At the age of modern modification and poisonous food consumption and chemical infusion on the food productions, we keep ourselves distance from it. CAP keep customers health as the first priority in our business activities by providing the Bio-Organic Food to people around the world. Therefore, CAP at the heart of business activities, envision: Live Heathier, Live Longer and Stronger through Organic Foods.

### **Vision**

**Empowering Myanmar farmer with smart farming system using technology to provide sustainable agriculture and organic food production in Myanmar.**

### **Mission**

**To provide sustainable development to farmers through gri-technology.**

**To create holistic opportunities to the farmers through the-know-how- Agriculture**

**To provide Organic and Healthy Food to the world from Chin State and Myanmar.**

## **Benefits of Solar Dryer:**

1. The higher temperature, movement of the air and lower humidity decreases drying time and reduces the risk of spoilage by microorganisms .
2. Food is enclosed in the dryer and therefore protected from dust, insects, birds and animals.
3. The dryers are waterproof , therefore, the food does not need to be moved during raining.
4. They are dried over stainless steel mesh, rather plastic mesh that emits harmful gases at higher temperatures.
5. Solar Dryer retains taste, colour, aroma and nutrients of food product.

Very easy to use

## **Why would someone buy our solar dryer ?**

- Lower cost
- Folding design ( lower transportation cost )
- Usable with sensitive products like apple, tomatoes, mango, jackfruit etc. which cannot be dried using polyhouse dryer or open sun drying.
- Provides best quality products
- Takes less drying time
- Portable ( can be moved in case of emergency )
- Modular design

### Solar Dried Products

4x8 Solar Dryer

2x4 Solar Dryer

## Our Services

Our services are categorized into two: to the farmers and to the general consumers of organic foods across the globe.

### 1. We provide Services to Farmers:

- We provide Seeds for better crops choice
- Soil Testing,
- Cultivation technic training
- Organic Fertilizers
- Markets for Farmers Harvest (we buy their raw products)
- Agri-Technologies: Solar dryer, Solar powered AI pest control and AI technology for smart farming.

### 2. General Consumers or Customers:

Providing Organic food both in raw material and value-added organic food. Our Organic Foods includes:

**Sacha Inchi**  
(*Plukenetia volubilis*)

**Coffee Beans**  
(*Coffea arabica*)

**Elephant Foot yam**  
(*Amorphophallus paeoniifolius*)

**Avocado**  
(*Persea americana*)

**Macadamia**
